

Yusril Dhiyaul Haq Muttaqien

Web Developer | idyusril@gmail.com | github.com/yusrmuttaqien | yusrmuttaqien.com | +62-822-4549-4050

I'm a web developer who focuses on front-end development with an understanding of UI/UX principles and web development practices. I coded both functional and visually pleasing interfaces for the web. Within my tenure, I grew my skillset and excelled at building custom logic that met business and user needs. I always seek out collaboration to both share and find new ways and perspectives to build better solutions on the web.

SKILLS

Languages: TypeScript/JavaScript. **Libraries & Technologies:** Next.js/React.js, Motion, Jest/Vitest, HTML5, CSS3/TailwindCSS, Node.js. **Design Tools:** Figma, Spline 3D, Blender. **Deployments:** Vercel, Jenkins

EXPERIENCES

Frontend Developer, Freelance/Contracts (2024 — Present)

- Create a custom slider with framer-motion only with drag gesture and auto scroll.

Frontend Developer, Telkom Indonesia (2021 — 2024)

- Work in agile environments, role as an FE developer, and early communicator between squads.
- Refactored Agreeculture's landing pages with precise responsive layouts and reusable, increasing user experiences both for mobile and desktop users.
- Adds multiple core features, including Dashboards for both business and personal, CMS for blog posts, traceability, and client product info, expands userbase, platform content, and services visibility.
- Reliably integrates frontend with (REST API) backend services and other Agreeculture services.
- Write unit tests, increasing codebase stability and reducing production bugs covering a minimum of 85% of codes.
- Participate in technical discussions in planning, testing, and solving design and technical obstacles.
- Mentored 6 newcomers, increased their onboarding speed and common and specific codebase knowledge

WordPress Frontend Developer, VHS Internship (Jul 2020 — Sep 2020)

- Designed and developed a website for a housing agency and generated 1 follow-up client on release week.
- Implemented SEO practices, placed in 1st page and 5th position in Google search on related keywords.
- Led a team of 5, consisting of 2 WordPress developers, 1 content creator, and 2 marketing researchers, architected a development plan for website creation.

PROJECTS

Cek Ongkir, Frontend development | [\[hosted\] github.com/yusrmuttaqien/dotkurir-site](https://github.com/yusrmuttaqien/dotkurir-site) (Aug 2024)

- TypeScript-based codebase, unified API data structure from fetching to component-level consumption.
- Utilize Next.js App router with server prefetch and local storage, provide data on the first byte, improve perceived performance.

Dashboard, Frontend development | [\[hosted\] github.com/yusrmuttaqien/dashboard-site](https://github.com/yusrmuttaqien/dashboard-site) (Dec 2023)

- Implement custom image uploader logic and drag-n-drop, integrate with available cropper library
- Create a Modal component with stacked capabilities for multi-leveled modal interactions

EDUCATION

Bina Nusantara University Online, Bachelor's in Information Systems (2023 – 2026)

VHS Telkom Malang, Software Engineering (2018 — 2021)

- Selected in TEFA program, working with industries as learning and practical materials.
- Part of English conversation group and committee, establishing VHS international events.

CERTIFICATION

Microsoft Technology Associate, Programming using JavaScript. Hackerrank, Frontend Developer (React). Hackerrank, Problem Solving (React). DOT Indonesia, Industry Software Engineering Competency. Dicoding Indonesia, Creating a web application with React.
